

BHAGYA SANKAR MADDELA

Senior Angular Developer — Frontend Engineer

Hyderabad, India

m.bhagyasankar@gmail.com — +91 9603789256 — linkedin.com/in/bhagyasankarmaddela

Open to International Opportunities

Professional Summary

Senior Angular Developer with 5 years of experience designing and developing enterprise web applications using Angular, TypeScript, JavaScript, SQL Server, and .NET technologies.

Experienced in frontend architecture, dynamic form frameworks, REST API integrations, application modernization, CI/CD practices, and production support.

Proven ability to deliver scalable solutions for healthcare and business-critical applications used by US-based organizations.

Technical Skills

Frontend Technologies: Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS

Angular Expertise: RxJS, Observables, Reactive Forms, Dynamic Forms, Dependency Injection, Route Guards, Lazy Loading, Signals, Computed Signals, Standalone Components

UI Frameworks: Angular Material, PrimeNG, Bootstrap

Backend and APIs: REST APIs, .NET APIs

Database: SQL Server, Stored Procedures

Reporting and Analytics: Power BI, DAX Measures, Power BI Service

DevOps and Tools: Git, GitHub, GitHub Actions, CI/CD, Postman, Jira, Visual Studio, VS Code

Methodologies: Agile, Scrum

Additional Skills: React, Next.js

Professional Experience

CommerzTech (India) Pvt. Ltd.

Sep 2024 – Present

Senior Software Programmer

- Sole frontend engineer responsible for Angular development, enhancements, and production support across enterprise healthcare applications.
- Developed and maintained Electronic Medical Record (EMR) modules used by healthcare providers.
- Designed and implemented Power BI dashboards, KPIs, and analytical reports using DAX.
- Published and managed reports in Power BI Service with role-based access control.
- Integrated Power BI reports within Angular applications.
- Developed SQL queries and stored procedures supporting operational and reporting requirements.
- Collaborated with backend teams for .NET REST API integrations.
- Resolved production-critical issues, defects, and performance bottlenecks.

Key Projects

EMR5 (Caduceus USA)

Enterprise Electronic Medical Record platform supporting Workers Compensation, Corporate Health, Patient Management, and operational healthcare workflows.

- Developed Angular modules supporting patient and healthcare workflows.
- Built Power BI dashboards and DAX measures for operational reporting.
- Developed SQL stored procedures supporting application and reporting requirements.
- Integrated Angular applications with .NET APIs.

- Implemented role-based dashboard visibility and reporting access.

PMR (Acme Health)

HIPAA-compliant healthcare portal focused on patient management, healthcare workflows, and operational process automation.

Sorano Technologies Pvt. Ltd.

May 2021 – Jul 2024

Software Programmer

- Developed and maintained enterprise Angular applications for healthcare administration systems.
- Designed and implemented metadata-driven dynamic form builders using Angular Reactive Forms, enabling controls, validations, and workflows to be rendered dynamically from database configurations.
- Built reusable UI components using Angular Material and PrimeNG.
- Integrated Angular applications with REST APIs and backend services.
- Participated in modernization initiatives involving migration of legacy .NET and VB-based applications to Angular.
- Improved application performance and user experience through UI modernization initiatives.
- Collaborated with distributed teams following Agile and Scrum methodologies.
- Contributed to React and Next.js based internal applications.

Key Projects

- **Gold Coast Health Plan** - Healthcare administration platform supporting operational workflows.
- **Custom Point** - Migration of legacy .NET user interfaces to Angular.
- **CA Life Line** - Healthcare administration modules and workflow management application.
- **PRISM** - Migration of a VB-based stock information system to Angular.
- **Online Exam Portal** - Internal assessment platform developed using React and Next.js.

Portfolio Project

CareerPilot - Job Application Tracking Platform

Technologies: Angular 19, TypeScript, Signals, RxJS, Standalone Components, ASP.NET Core (.NET 10), C#, Entity Framework Core, PostgreSQL, JWT, Docker, Vercel, Render, Neon

- Developed a full-stack job application tracking platform for managing applications, companies, recruiters, and interviews through a responsive analytics dashboard.
- Architected the Angular frontend using Standalone Components, Signals, Computed Signals, lazy loading, Reactive Forms, functional guards, and HTTP interceptors.
- Built RESTful APIs using ASP.NET Core, Entity Framework Core, and PostgreSQL with CRUD operations, search, filtering, sorting, pagination, and per-user data isolation.
- Implemented JWT authentication, profile management, password change, and secure single-use, expiring token-based password reset workflows.
- Added automated frontend and backend tests, containerized the API with Docker, and deployed the full stack using Vercel, Render, and Neon PostgreSQL.

Live Demo: career-pilot-brown.vercel.app

GitHub: github.com/Bhagi0459/career-pilot

Nimbus AI - AI Powered Weather Intelligence Platform

Technologies: Angular 19, TypeScript, Signals, Standalone Components, RxJS, Express.js, REST APIs, GitHub Actions, Vercel, Render

- Developed a modern Angular application using Standalone Components and Signals-based state management.

- Implemented AI-generated weather insights powered by Groq APIs.
- Built an Express.js middleware layer for secure API communication.
- Utilized Computed Signals and modern Angular architecture patterns.
- Configured GitHub Actions workflows for automated build validation.
- Deployed frontend and backend services using Vercel and Render cloud platforms.
